Installing Trend Micro Mobile Security

System Requirements

Before installing and using Mobile Security, ensure that your mobile device meets the requirements

OPERATING SYSTEM	MEMORY	STORAGE
IOS v4.x or above	4-MB	3-MB

To determine the Android version running on your mobile device:

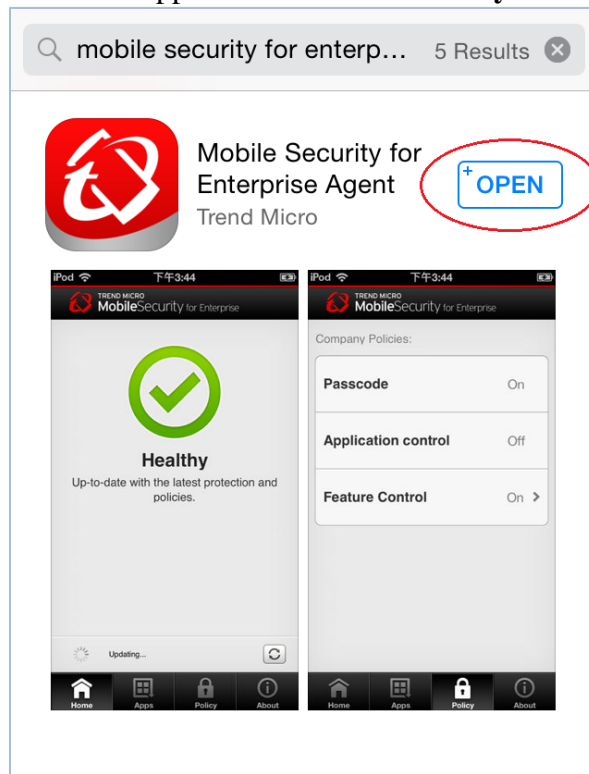

1. On your mobile device, navigate to **Settings > General > About**.
2. On the **About** screen, verify the iOS version.

Installing Mobile Security

This section explains how to install Mobile Security on your mobile device manually.

1. Make sure your mobile device is connected to the Internet.

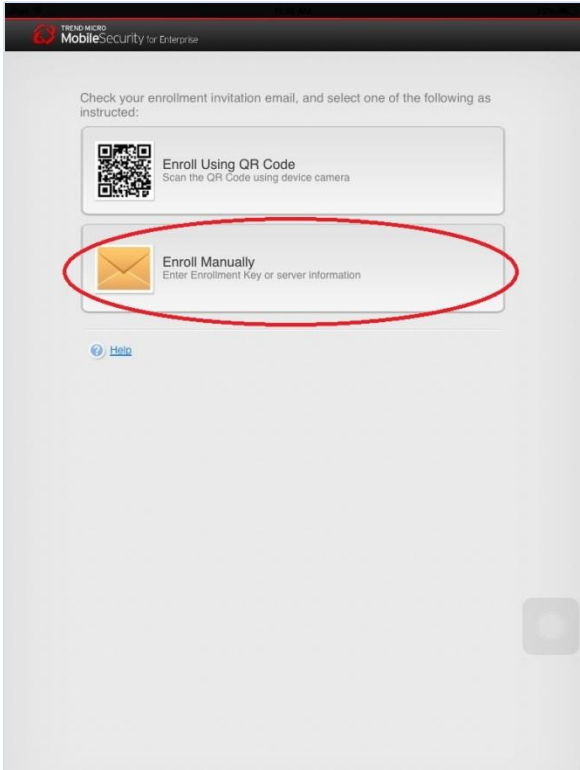

2. Go to the Apple Store and search for the application **Mobile Security for Enterprise Agent**.

3. From the search results, tap Trend Micro Mobile Security, and then tap **Install**

4. After the installation process is completed, open the application and enroll your mobile device to the Mobile Security server.

Tap Enroll Manually

Go to Local server and Configure the following fields on the screen.

◆ **Server Name or IP address – mobileav.sabah.gov.my**

◆ **Port – 443**
